DETAILED ACTION

The Amendment filed July 14, 2010 has been entered and considered.

Allowable Subject Matter

Claims 18, 22-27, 30, 33, 34 and 36 are allowed. These claims are allowed for those reasons outlined in prior actions.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Claim Rejections - 35 USC § 112

The following is a quotation of the first paragraph of 35 U.S.C. 112:

The specification shall contain a written description of the invention, and of the manner and process of making and using it, in such full, clear, concise, and exact terms as to enable any person skilled in the art to which it pertains, or with which it is most nearly connected, to make and use the same and shall set forth the best mode contemplated by the inventor of carrying out his invention.

Claims 19, 20, 31, 32 and 35 are rejected under 35 U.S.C. 112, first paragraph, as failing to comply with the written description requirement. The claim(s) contains subject matter which was not described in the specification in such a way as to reasonably convey to one skilled in the relevant art that the inventor(s), at the time the application was filed, had possession of the claimed invention.

Regarding claims 19, 20, 31 and 32, these claims recite that the target is both rotationally and translationally mobile. The specification provides several embodiments

Art Unit: 2858

wherein the target is either rotationally OR translationally mobile. No embodiment provides for both movements. Independent claim 1 now requires rotational movements. Each of depending claims 19, 20, 31 and 32 requires translational movement. Thus, to now recite both movements in such an arrangement in the claims is new matter.

Regarding claim 35, it recites "linear travel". For the same reason as noted in the previous paragraph, there is no disclosure of both rotational movement of the target and linear travel and accordingly, the recitation in claim 35 of both movements is also new matter for the same reasons therefor.

Response to Arguments

Applicant's arguments with respect to the claims have been considered but are moot in view of the new ground(s) of rejection. The new 112 rejections were required in view of the substantial amendments to the claims.

Conclusion

Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire **THREE MONTHS** from the mailing date of this action. In the event a first reply is filed within **TWO MONTHS** of the mailing date of this final action and the advisory action is not

Art Unit: 2858

mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the date of this final action.
